

# American POTATO JOURNAL

*Official Organ of  
The Potato Association of America*

VOLUME 48  
JANUARY-DECEMBER, 1971

Editor-in-Chief  
JOHN C. CAMPBELL

Associate Editor  
CHARLES E. CUNNINGHAM

## THE POTATO ASSOCIATION OF AMERICA

% RUTGERS UNIVERSITY COLLEGE OF AGRICULTURE AND  
ENVIRONMENTAL SCIENCE

NEW BRUNSWICK, NEW JERSEY 08903

### OFFICERS

ROBERT L. PLAISTED, *President*

PAUL N. MOSHER, *President-Elect*

ROBERT KUNKEL, *Vice President*

ROBERT JOHANSEN, *Past President*

HUGH J. MURPHY, *Secretary*

JOHN C. CAMPBELL, *Treasurer*

### DIRECTORS

HERMAN TIMM

KENNETH KNUTSON

ROBERT MERCER

JHN SCHOENEMANN

EDWARD D. JONES

### SUSTAINING MEMBERS

STARKS FARMS, INC. ....	Route 3, Rhinelander, Wisconsin	54501
FRITO-LAY, INC. ....	3420 Singleton Blvd., Dallas, Texas	75212
ROHM AND HAAS COMPANY .....	Philadelphia, Pennsylvania	19105
McCAIN FOODS LIMITED .....	East Florenceville, N. B., Canada	
CLAUDE BOTKIN CO., INC. ....	316 Haven Drive, Arvin, California	93203
PPG INDUSTRIES, INC., <i>Chemical Division</i> .....	One Gateway, Pittsburgh, Pa.	15222
PAUL HORN FARMS, INC. ....	Moorehead, Minnesota	56560
FRANK L. CLARK .....	3711 N. 29th Ave., St. Petersburg, Florida	23713
FMC CORP., <i>Niagara Chemical Division</i> .....	Middleport, N. Y.	14105
RYAN POTATO COMPANY .....	East Grand Forks, Minnesota	56721
THE R. T. FRENCH COMPANY .....	1 Mustard St., Rochester, N. Y.	14609

## INDEX TO VOLUME 48

### AUTHOR AND TITLE INDEX

- AKELEY, R. V., H. J. MURPHY and R. C. CETAS. Abnaki: A new high yielding potato variety resistant to verticillium wilt and leaf roll, 230-233
- ALEXANDER, R. L., *see* MANZER, F. E.
- ALLABY, E. S., *see* DAVIES, H. T.
- BAGNALL, R. H., *see* SINGH, R. P.
- BEDFORD, C. L., *see* POPE, L. R.
- BISHOP, JAMES C., *see* GRIMES, DONALD W.
- BIRECKI, M., H. J. BIZEN and H. M. HENDERSON. Effect of culture, storage and variety on polyphenol oxidase and peroxidase activities in potatoes, 255-261
- BIZEN, H. J., *see* BIRECKI, M.
- BRETZLOFF, CARL W. Calcium and magnesium distribution in potato tubers, 97-104
- BRETZLOFF, CARL W. A method for the rapid estimation of glycoalkaloids in potato tubers, 158-162
- BRETZLOFF, C. W. and JOHN McMENAMIN. Some aspects of potato appearance and texture, III. Sampling tubers for cation analysis, 246-254
- CALLBECK, L. C., *see* JAMES, W. C.
- CASTRO, MARLENE D., *see* HOFF, J. C.
- CETAS, R. C., *see* AKELEY, R. V.
- CHOUDHURI, H. C. Spontaneous chromosome aberrations in diploid solanum, 187-194

## SUBJECT INDEX

- Aberrations, chromosome, in diploid solanum, 187  
Abnaki: resistant to verticillium wilt and leaf roll, 230  
Acrylamide gel electrophoresis, use in distinguishing tuber protein patterns for variety identification, 57  
Aerial pesticide spraying for late blight control, 195  
Airblast spraying for late blight control, 195  
Aldicarb for nematode control, 21  
Amino acid pool in potato tubers affected by nitrogen, 390  
Analysis for total glycoalkaloids, methods compared, 410  
Anatomy and compositional variation, IV total solids distribution, 269  
Anions and cations affect sloughing of potato tissue, 385  
Anions removed from potato extracts by treatment with Duolite Resin A-4, 385  
Aphids, biological control of, 439  
Area of tuber surface calculated, 82  
Arsenic residues in red clover, 395  
Biological control of aphids, 439  
Blackspot, resistance to, 295  
    susceptibility related to peroxidase and catalase enzymes, 16  
    susceptibility, measurement of, 71  
    testing for resistance to, 295  
Book reviews: American Potato Yearbook, 222  
    Fungicide and nematicide tests, results of 1970, 70  
    Genetics of the potato, *Solanum tuberosum*, 137  
    Pathogenic root-infecting fungi, 222  
Breeding with tetraploid parents to improve total nitrogen and total solids, 428  
Broadcast vs. band placed fertilizer for potatoes in Virginia, 26  
Burbidge, Arden, honored, 287  
Calcium and magnesium distribution in potato tubers, 97  
Calcium, magnesium and potassium concentrations in tubers, 246  
Calculation of potato tuber surface area, 82  
Carbofuran for nematode control, 21  
Carbon monoxide in storage, 299  
Catalase and peroxidase as related to blackspot, 16  
Cation analysis, methods of sampling tubers for, 246  
Cations removed from potato extracts, 385  
Cell, one: a thin slice of profit, 47  
Cell size in Russet Burbank tubers with levels of nitrogen and soil moisture, 450  
Certified seed potato production by varieties (U. S. and Canada), 1970, 129  
Certification officials and agencies in the U. S., 135  
Chemical composition of potatoes as related to nitrogen, 1  
Chemical control of seed-corn maggot, *Hylemya platura*, and seed-piece decay, 374  
Chemical maturity related to sucrose synthetase activity, 37  
Chemical weed control in potatoes, 116, 214, 423  
Chemicals for control of insects, 21, 64, 374, 439  
Chip color of Monona and Kennebec from 40 F storage and exposure to ethylene, 183  
Chip and dice thickness as related to processing losses, 47  
Chromosome aberrations, spontaneous, in diploid solanum, 187  
Cold stored potatoes, differential response of, to ethylene, 183  
Comparison of inoculation methods on ring rot development in potatoes, 225  
Composition of free amino acids in potato tubers affected by nitrogen fertilization, 390  
Consistency of reconstituted instant potato flakes measured, 88  
Constancy of the protein electrophoretic pattern of a potato tuber variety, 57  
Control of aphids, 439, 298  
Corn borer in potato, 298  
Culture, storage and variety, effect of, on polyphenol oxidase and peroxidase, 255  
Curing conditions, influence of, on weight loss during storage, 278  
Disc electrophoresis patterns useful in *Streptomyces* spp. studies, 206  
Detergents for control of tuber greening, 53  
Differential response of cold stored potatoes to ethylene, 183  
Diploid solanum, spontaneous chromosome aberrations in, 187

- Diseases: blackspot susceptibility, 16, 71  
leaf roll, Abnaki variety resistant to, 230  
late blight control, 195  
late blight losses, estimating method, 457  
ring rot development: inoculation methods compared, 225  
seed-piece decay, 374  
*Streptomyces spp.*, isolated from Maine potatoes, 206  
spindle tuber virus, 262  
verticillium wilt: Abnaki variety resistant to, 230  
Dry matter-specific gravity relationship as related to intercellular space, 173  
Durometer tests of raw tubers, 329  
Dynamics, population and studies of aphid control, 439  
Early potato yield as affected by green sprouting of seed, 381  
Electrophoretic pattern of tubers for variety identification, 57  
Enzymes, distribution of oxidase, in tubers relative to blackspot susceptibility, 16  
Esterase electrophoretic patterns of *Streptomyces spp.*, 206  
Estimating method for yield losses due to late blight, 457  
Ethylene treatment of potatoes from storage as related to chip color, 183  
Evaluation of frost resistant tuber-bearing solanum hybrids, 339  
Extract from potato leaves removed by machine, 33  
Fertilizer application methods for Irish potatoes compared, 26  
Fertilizer recommendations for potatoes as related to soil heterogeneity, 163  
Fertilization with nitrogen as related to composition of free amino acids in tubers, 390  
Flakes, instant potato, consistency measured, 88  
Free amino acid pool in tubers as affected by nitrogen fertilization, 390  
French fried potatoes, objective measurement of, 329  
French fried potato strips, leaching of, 199  
Frozen Potato Products Institute elects officers, 224  
Frost resistant tuber-bearing solanum hybrids evaluated, 339  
Frutchev, Cecil, obituary, 355  
Fumigation with Vorlex for meadow nematode control, 64  
Glycoalkaloids in tubers, a method for rapid estimation of, 158  
Glycoalkaloid analysis, methods of, compared, 410  
Grade of potatoes influenced by soil physical properties, 414  
Green sprouting of seed, effect of, on yield of early potatoes, 381  
Greening of tubers, control of, with household detergents, 53  
Growth characteristics of potatoes and biological control of aphids, 439  
High solids hybrids for processing absorb less oil, 403  
Household detergents for control of tuber greening, 53  
*Hylema platura*, control of, as related to potato seed-piece decay, 374  
Insecticides, systemic, for nematode control, 21  
Inoculation methods on ring rot development, 225  
Instant potato flakes consistency measured, 88  
Intercellular space differences as related to variety and storage and specific gravity-dry matter relationship, 173  
Internal quality of Russet Burbank vs. storage temperature, 320  
Irish potato yields as affected by fertilizer placement, 26  
Juice removed from potato leaves by machine, 33  
Kennebec maturity related to sucrose synthetase activity, 37  
Kunkel, Robert, honored, 289  
Late blight control with low volume spraying in Maine, 195  
Late blight, estimating yield losses due to, 457  
Leaching of french-fried potato strips, 199  
Low gallonage spraying in Maine, 195  
Magnesium distribution in potato tubers measured, 97  
Maine, late blight control in, with low volume spraying, 195  
Maine, protein and electrophoretic patterns of *Streptomyces spp.* in, 206  
Maturity of Netteed Gem seed as related to yields, 113  
Meadow nematode (*Pratylenchus penetrans*) control with systemic insecticides, 21, 64  
Measurement of texture variables in raw and french fried potatoes, 329  
Method for estimating tuber yield losses due to late blight, 457  
Mills, Wilford R., honored, 2293  
National Potato Utilization Conference program, 139

- Nematode control, 21, 64  
Nitrate levels in petioles and soils as related to yields, 105  
Nitrogen fertilization, effect of, on composition of free amino acids in tubers, 390  
Nitrogen levels, effect of, on tuber cell size, 450  
Nitrogen rate and placement related to production and composition of potatoes, 1  
Nitrogen, total, breeding for in tetraploids, 428  
Norchip maturity related to sucrose synthetase activity, 37  
North Dakota "leaf squeezer" for removing juice from potato leaves, 33  
Peat soil, effect of specific gravity and maturity of seed on yields in, 113  
Peroxidase activity in potatoes, 255  
Peroxidase and catalase as related to blackspot, 16  
Peru, potato center in, headed by Sawyer, 137  
Physical maturity of potatoes related to sucrose synthetase cleavage activity, 37  
Placement and rate of nitrogen related to production and chemical composition, 1  
Pollution, water, influenced by slicing methods and cell size, 47  
Polyphenol oxidase and peroxidase as affected by culture, storage and variety, 255  
Potato appearance and texture: III Cation analysis, 246  
Potato Association of America, The  
    abstracts of papers presented at annual meeting, 295  
    American Potato Journal back issue sale announced, 310  
    annual meeting, call for papers for, 35, 69  
    annual meeting, highlights, 309  
    annual meeting program, 139  
    committee members for 1971-1972, 398  
    constitution and by-laws, 352  
    honorary life members  
        Burbidge, Arden, 287  
        Kunkel, Robert, 289  
        Mills, Wilford R., 291  
        Treadway, Robert, 293  
    information for authors, 30  
    introduction of president, Robert Plaisted, 344  
    minutes of meetings, 345  
Potato extractives: sloughing as related to replacement of anions or cations, 385  
Potato plants, growth of, in studies of aphid control, 439  
Potato spraying with low volume applications in Maine, 195  
Potato research and promotion act signed, 32  
Potato tubers, cell size in Russet Burbank, 450  
*Pratylenchus penetrans*, control with systemic insecticides, 21, 64  
Processed french fried potatoes, measurement of, 329  
Processed potato flakes, consistency measured, 88  
Processing characteristics of *Solanum tuberosum*-*S. stoloniferum* hybrids, 403  
Processing, general, 47, 88, 183, 199, 329, 403  
Processing losses related to thickness of chips and dice, 47  
Production and chemical composition of potatoes related to nitrogen, 1  
Production of certified seed potatoes—1970, 129  
Protein, crude, studies in breeding program, 428  
Protein patterns, use of, for variety identification, 57  
Protein and esterase electrophoretic patterns of *Streptomyces* spp. isolated from Maine potatoes, 206  
Pungo yields as related to fertilizer placement, 26  
Quality measurement of potatoes by shear press, 359  
Railway cars, new large, promise savings for potato industry, 70  
Raw potato, shear press determinations of, 359  
Red clover, arsenic residues in, from use of sodium arsenite, 395  
Respiration of tubers in storage, following 2,4-D treatment, 366  
Ring rot development studied, 225  
Row fumigation with Vorlex for meadow nematode control, 64  
Row treatments with systemic insecticides for nematode control, 21  
Russet Burbank tubers, cell size in, 450, *see* Varieties  
Seed-corn maggot control and seed-piece decay, 374  
Seed maturity as related to potato yields in peat soil, 113  
Seed-piece decay, control of, 374

- Seed potato certification officials and agencies in U. S., 135  
Seed potato production in U. S. and Canada, 129  
Selection potential for TN and solids in tetraploids, 428  
Shear force curves of raw and processed potatoes, 329  
Shear press determinations of raw potatoes, a tool for quality measurement, 359  
Sloughing as related to replacement of anions or cations, 385  
Sodium arsenite related to arsenic in Red Clover, 395  
Soil heterogeneity, soil samples and fertilizer recommendations, 163  
Soil moisture tensions, effect of, on cell size of Russet Burbank tubers, 450  
Soil nitrate levels related to potato yields, 105  
Soil physical properties, influence on potato yields and grade, 414  
Solanum hybrids, frost resistance in, 339  
*Solanum tuberosum*-*S. stoloniferum* hybrids with high solids for processing, 403  
Solids distribution in six varieties, 269  
Solids, total, breeding for, in tetraploids, 428  
Specific gravity-dry matter relationship and intercellular space, 173  
Specific gravity and maturity of seed as related to potato yields in peat soil, 113  
Specific gravity related to storage conditions, 313  
Spindle tuber virus, losses due to, 262  
Spraying potatoes with low volume sprayers in Maine, 195  
Storage conditions, effect on weight changes and specific gravity, 313  
Storage conditions influence various properties of potatoes, 234  
Storage, effect of, on polyphenol oxidase and peroxidase activity in potatoes, 255  
Storage effect of, on tensile strength of tubers, 148  
Storage, effect on specific gravity-dry matter relationship, 173  
Storage temperature for internal quality of Idaho Russet Burbank potatoes, 320  
Storage, weight loss during, 278  
*Streptomyces* spp. isolated in Maine potatoes, 206  
Sucrose synthetase activity related to maturity of potatoes, 37  
Systemic insecticides for nematode control, 21  
Tensile properties of potato tubers, 148  
Tetraploid breeding population for increase in TN and total solids, 428  
Texture and respiration of potatoes in storage after 2,4-D application, 366  
Texture variables, measurement of, in raw and processed french fried potatoes, 329  
Total nitrogen and total solids, breeding for, in tetraploids, 428  
Total solids distribution in six varieties, 269  
Treadway, Robert, honored, 293  
Tuber surface area calculated, 82  
Tuber yield losses estimated, 457  
2,4-D residues in tubers following applications to improve color and tuber size, 366  
Unitizing 10-pound bags of potatoes can cut costs, 223  
Varieties: Abnaki released, 230  
    Green Mountain, aphid control in, 439  
        estimating late blight in, 457  
    Irish Cobbler, aphid control in, 439  
        intercellular spaces in, 173  
        protein content in, 57  
    Katahdin, aphid control in, 439  
        blackspot in, 71  
        intercellular spaces in, 173  
        late blight losses estimated in, 457  
        nematode control in, 21, 64  
        nitrogen levels related to yields, 105  
        protein levels in, 57  
        spindle tuber, losses in, 262  
        storage studies with, 234, 278, 313  
    Kennebec, aphid control in, 439  
        calcium and magnesium distribution in, 97, 246  
        chip color in, as related to ethylene treatment, 183  
        fertilizer, reaction to, in Alaska, 1  
        mechanical properties of, 148  
        processing, use in, 403  
        spindle tuber losses in, 262  
        sucrose levels in, 37
